I am a fresh graduate in Informatics Engineering from Universitas Negeri Semarang with strong analytical, problem- solving, and communication skills. I am highly adaptable and able to work both independently and in a collaborative team environment. My core expertise lies in data analytics, including data processing, visualization, and insight generation, with proficiency in tools and technologies such as Python, MySQL, Microsoft Excel, Looker Studio, and Tableau. Supported by an academic foundation and practical experience through projects and internships, I am eager to start my career as a Data Analyst, where I can leverage my skills to deliver data-driven solutions, contribute to organizational growth, and continuously enhance my professional capabilities.
